

By default, all users can view and manage their own friends via the **Friends** application. To see and manage friends of other users, you need to use the **Users** application and go to the **Friends** tab.

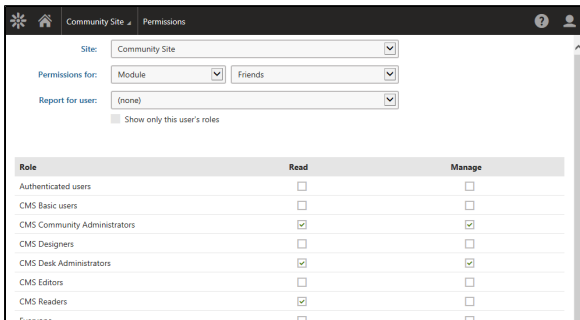

In the **Permissions** application, you can find a permission matrix for controlling access to the *Friends* tab in the *Users* application.

To configure permissions for the *Friends* tab:

1. Open the **Permissions** application.
2. In the first **Permissions for** drop-down list, choose **Module**.
3. In the second drop-down list, choose **Friends**.

The following permissions can be assigned to particular roles:

- **Read** – members of the role can access the *Friends* tab in the *Users* application and view friends of users.
- **Manage** – members of the role can manage friends of users on the *Friends* tab in the *Users* application.

The screenshot shows the 'Permissions' application interface. At the top, there's a navigation bar with 'Community Site' and 'Permissions'. Below this, there are three dropdown menus: 'Site:' (Community Site), 'Permissions for:' (Module), and 'Report for user:' ((none)). A checkbox labeled 'Show only this user's roles' is also present. The main part of the interface is a table with columns 'Role', 'Read', and 'Manage'.

Role	Read	Manage
Authenticated users	<input type="checkbox"/>	<input type="checkbox"/>
CMS Basic users	<input type="checkbox"/>	<input type="checkbox"/>
CMS Community Administrators	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
CMS Designers	<input type="checkbox"/>	<input type="checkbox"/>
CMS Desk Administrators	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
CMS Editors	<input type="checkbox"/>	<input type="checkbox"/>
CMS Readers	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Everyone	<input type="checkbox"/>	<input type="checkbox"/>
