

There are cases when you may want to remove formatting from a text in a text area. For example, when you [paste](#) a preformatted text or when you simply want to restyle your text.

To remove formatting from a text

1. With your mouse, select the text from which you want to remove formatting.

If you want to remove text formatting from all text in a text area, you can click in the text area and press **Ctrl + A** on your keyboard.

2. In the editor toolbar, click on the **Remove format** button.

The system removes the formatting from the text.
