

The Kentico E-commerce Solution allows you to specify a supplier for each [product](#). You can use this information typically for your internal purposes to optimize your e-business.

Assigning suppliers to products

To assign a supplier to a product:

1. Open the **Products** application.
2. [Add a new product](#) or **Edit** (✎) an existing product.
3. In the **Supplier** field on the **General** tab, select a supplier or add a new one.

4. Click **Save**.

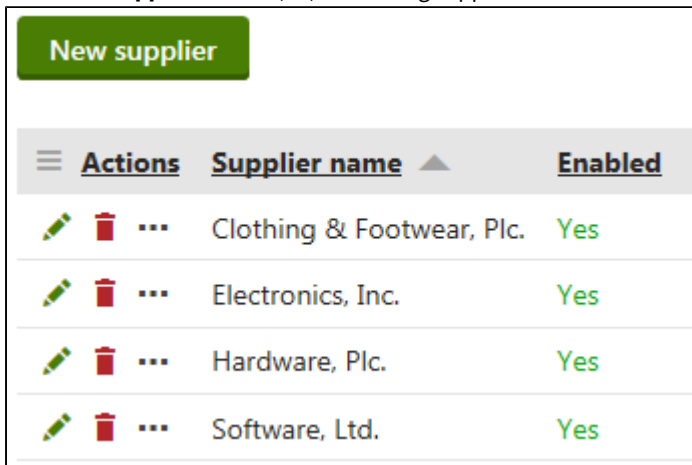

The system assigns the supplier to the product.

Creating and editing suppliers

To create or edit a supplier:

1. Open the **Suppliers** application.
2. Click **New supplier** or **Edit** (✎) an existing supplier.

New supplier

|  <u>Actions</u> | <u>Supplier name</u>  | <u>Enabled</u> |
|---|--|----------------|
|   ... | Clothing & Footwear, Plc. | Yes |
|   ... | Electronics, Inc. | Yes |
|   ... | Hardware, Plc. | Yes |
|   ... | Software, Ltd. | Yes |

3. Enter [supplier properties](#).
4. Click **Save**.

The system creates a new supplier or edits an existing supplier.

✓ You can create new suppliers also when [assigning a supplier](#) to a product in the **Products** application.

However, you cannot set all available supplier properties from there.

Reference – Supplier properties

| Property | Description |
|----------------|--|
| Display name | Specifies the name of the supplier displayed to the users on the live site and in the administration interface. |
| Code name | Serves as a unique identifier of the supplier object (for example used by developers in custom code). Unless there is a reason to set a particular value, you can leave the default (<i>automatic</i>) option, and the system generates an appropriate code name automatically. |
| Supplier email | Allows you to enter the supplier's email address. |
| Supplier phone | Allows you to enter the supplier's phone number. |
| Supplier fax | Allows you to enter the supplier's fax number. |
| Enabled | Indicates whether the supplier is active in your on-line store. Disabled options appear grayed out in selectors within the administration interface, but can still be assigned to products. |
