

Use the **New site wizard** to add new websites to the system. You can access the wizard in the **Sites** application.

Step 1 - Choose default website

In the first step of the wizard, choose if you want to create the new site using a wizard or import a web template.

- [Create a new site using a wizard](#) - creates a new blank site.
- [Use web template](#) - creates a new site based on a web template.

Click **Next**. Follow the links above to learn about the rest of the site creation process.
