

[Customers](#) may want to change the information you store about them. For example, they may want you to change their addresses. Alternatively, if your customer is a company, they may want to change their contact person's name.

 If you need to modify a customer's details in an existing order, you need to change the order's attributes. Learn more in [Orders](#).

With the following process, you can change the customer's:

- First and last name
- Email address
- Phone number
- Company name
- Company organization ID
- Company tax organization ID
- Billing and shipping addresses
- Orders

You can also [create a user account](#) for such customer. With a [user account](#), the customer can sign in on your website and buy their stuff on their own the next time.

If the customer is already registered or you create the user account, you can also change the customer's:

- Password (or generate a new one)
- [Roles](#)
- [Memberships](#)
- [Credit balance](#)

To change customer's details:

1. Open the **Customers** application.

 If you do not know how, see [Using the Kentico interface](#).

2. **Edit** () the desired customer.

 You can edit a customer by clicking the **Edit** icon (). Choose the **Edit** icon that is on the same line as the name of the customer whose attributes you want to change.

  ...		Riggs	Martin	martin@riggs.com	10/6/2015 12:11:10 PM	No

3. Customers' attributes are typically divided into tabs. Switch to the desired tab.

 If the customer is not registered, you can see only some of the tabs.

 You can see specific instructions if you are interested in:

- [Registering the customer](#) (creating a user account for the customer)
- [Assigning roles to the customer](#)
- [Assigning memberships to the customer](#)
- [Managing the customer's credit](#)

4. Type or select values of the customer's attributes you want to change.

5. Click **Save**.

The system saves the changes. You can see the updated information in the listing or when editing the customer again.
