

If you create an [alternative form](#) and give it one of the reserved code names listed below, the system automatically uses the alternative form when performing the corresponding action.

For example, if you create an alternative form for a page type and give it the *insert* code name, the form is used when pages of the type are created in the **Pages** application.

The following table shows the reserved code names and the actions for which the particular forms are used:

Alternative form code name	Usage	Supported by
filter	<p>Filter displayed above a list of items.</p> <p>See Displaying filters using alternative forms for more information.</p> <p>Examples:</p> <ul style="list-style-type: none">• Page types - Extending the page type listing filter• Forms - Creating a custom Contact us form filter	Forms, Custom tables, Page types
insert	<p>Form used when creating a new item.</p> <p>Examples:</p> <ul style="list-style-type: none">• Creating a custom Page type insert form	Forms, Custom tables, Page types, system classes
newculture	<p>Form used when creating a new culture version of a page.</p>	Page types
update	<p>Form used when editing an existing item.</p>	Forms, Custom tables, Page types, system classes
