

On this tab, you can adjust settings related to [OpenID authentication](#).

General	
Enable OpenID	Indicates if OpenID authentication is enabled.
Assign new users to roles	New users registered via OpenID will be assigned to these roles.
Require d user data page	URL of the page where the <i>OpenID required data</i> web part resides. If entered, then when a new OpenID user logs in to the site, their user account is not created automatically, but they are redirected to this page and required to enter some additional data (or merge with an existing account) using the web part.
