

The Kentico REST service supports [ODATA](#) by providing service documents in a standard format for ODATA services. The service documents provide information about the types of data available via the REST service and about the URLs under which the data can be accessed.

The service documents are available under the following URLs:

- **~/rest** - exposes the service document. The document contains a list of all available primary object types (without child and binding object types) and the URLs under which the objects can be accessed.

```
<?xml version="1.0"?>
- <service xmlns="http://www.w3.org/2007/app" xmlns:a10="http://www.w3.org/2005/Atom">
  - <app:workspace xmlns:app="http://www.w3.org/2007/app">
    <a10:title type="text">Objects</a10:title>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/cms.licensekey?format=xml">
      <a10:title type="text">cms.licensekey</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/cms.webfarmserver?format=xml">
      <a10:title type="text">cms.webfarmserver</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/staging.server?format=xml">
      <a10:title type="text">staging.server</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/cms.settingskey?format=xml">
      <a10:title type="text">cms.settingskey</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/cms.cssstylesheet?format=xml">
      <a10:title type="text">cms.cssstylesheet</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/cms.uiculture?format=xml">
      <a10:title type="text">cms.uiculture</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
    - <app:collection href="http://localhost/KenticoCMS_4290.14933/rest/cms.resourcestring?format=xml">
      <a10:title type="text">cms.resourcestring</a10:title>
      <app:accept>text/xml</app:accept>
    </app:collection>
  </app:workspace>
</service>
```

- **~/rest/<object type>/site** - lists all sites on which the specified object type is available and provides the REST URLs under which the object data can be retrieved for individual sites.

```
<?xml version="1.0"?>
