

This example demonstrates how to apply multiple volume discounts on a selected [product](#). The example uses the sample *E-commerce Site*.

The *Nike Race Day* T-shirt has three volume discount levels that reduce the price of the product items by a specified percentage, if purchased in appropriate amounts.

Selecting the product

First, you need to select the product to which the system applies volume discounts if purchased in appropriate amounts.

1. Open the **Products** application.
2. Select **Clothing -> T-shirts** in the product sections tree.
3. **Edit** (🔧) the *Nike Race Day* T-shirt.
4. Switch to the **Advanced -> Volume discounts** tab.

Now you can add volume discounts to the product.

Adding volume discounts to the product

Add three volume discounts to the currently edited T-shirt to set up multiple volume discount levels for the product.

1. Click **New volume discount**.
2. Enter the following values for the first volume discount's properties:
 - **Minimum quantity:** 3
 - **Discount:** Percentage
 - **Amount:** 10
3. Click **Save**.
4. Click the **Volume discounts** tab to return to the **Volume discounts** screen.
5. Enter the following values for the second volume discount's properties:
 - **Minimum quantity:** 5
 - **Discount:** Percentage
 - **Amount:** 15
6. Click **Save**.
7. Click the **Volume discounts** tab to return to the **Volume discounts** screen.
8. Enter the following values for the third volume discount's properties:
 - **Minimum quantity:** 10
 - **Discount:** Percentage
 - **Amount:** 20
9. Click **Save**.

The system sets up three volume discount levels for the T-shirt by adding to the product three volume discounts. If [customers](#) add an appropriate amount of the T-shirts to their shopping carts, the system automatically applies the corresponding volume discount.

New volume discount

Product price: \$58.00

Actions	Minimum quantity	Amount per item
	3	10%
	5	15%
	10	20%

Applying the volume discounts

While editing an existing order in the administration interface

1. Open the **Orders** application.
2. **Edit** () the selected [order](#).
3. Switch to the **Items** tab.
4. Add three *Nike Race Day* T-shirts.
 - a. Click **Add item**.
 - The system opens the **Add order items** dialog.
 - b. Select the *Nike Race Day* T-shirt.

Click the name of the product leaving the **Quantity** field empty. The system opens the **Add order items** dialog with the product details displayed.

The system behaves like this because the product has [product options](#).

- c. Specify the amount of product items:
 - **Units:** 3
- d. Click **Add to cart**.
 - The system applies the volume discount from the lowest discount level (10%) and recalculates the order.

Step 1 of 2 | Add some products to your shopping cart

Shopping cart

Add item

Remove	Actions	Product name	Units	Unit price	Discount	Subtotal
<input type="checkbox"/>		Nike Race Day	3	52.20	0.00	156.60
- M			3			

If you have a coupon code, please enter it here:

Total shipping: \$15.00
Total tax: \$0.00
Total price: \$171.60

Empty ☐ Send order changes by email

Update

OK

The volume discount is included in the displayed **Unit price**. If you view the **Price detail** (🔍), you can see a detailed summary of all applied discounts.

If you now click **OK**, the system saves the order with the volume discount applied.

While shopping on the live site

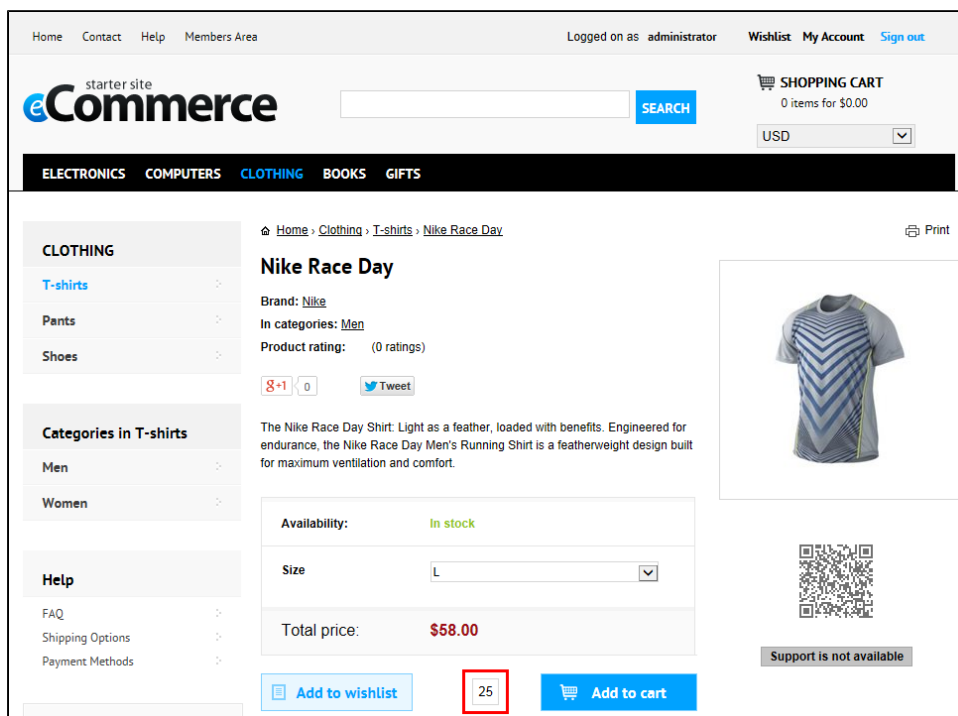

1. View the live site.
2. Select **Clothing** -> **T-shirts** in the on-line store's main menu.
 - The system displays a list of all T-shirts offered in the store.
3. Click **Add to cart** in the *Nike Race Day* section.

The product has product options. That's why the system now displays the product's details page.

Here you can specify the amount of product items.

4. Enter 25 for the amount of product items.

5. Click **Add to cart** again.

- The system displays the content of your shopping cart with the volume discount from the highest discount level (20%) applied.

The screenshot shows the Kentico e-commerce application interface. At the top, there's a search bar and a shopping cart icon indicating 25 items for \$1160.00. Below the navigation bar, a modal window titled "Product price detail" is open, displaying the pricing details for "Nike Race Day". The modal shows a standard price of \$58.00, a catalog-level discount of \$11.60 (highlighted with a red box), a unit price of \$46.40, and a total price of \$1160.00. A "Catalog-level discount summary" section shows a volume discount for a minimum amount of 10 units, resulting in a \$11.60 discount. The background shows the shopping cart with a table of items, including "Nike Race Day" with 25 units at a unit price of \$46.40, totaling \$1160.00. A "Check out" button is visible at the bottom right of the modal.

Units	Unit price	Subtotal
25	\$46.40	\$1160.00

Other Payments: \$0.00
Total price: \$1160.00

Check out

If you now click **Check out**, you can continue in the [checkout process](#).
