

The system allows you to specify which language versions of pages users are allowed to edit.

1. Open the **Users** application.
2. **Edit** (✎) the user.
3. Switch to the **Languages** tab and select one of the following options:
 - **User can edit all languages** - the user can edit pages in any language.
 - **User can edit following languages** - you can choose which language versions the user can edit. The *Select site* list allows you to configure the language bindings for specific websites.
