

[Working with pages](#)

Learn how you can edit content and insert new content into Kentico pages.

[Using the editor](#)

Learn about the functionality of the built-in text editor. Such as styling your text, inserting media into text or using the spelling checker.

[Working with files](#)

Add and remove files from page attachments, content tree and media libraries. Learn how to best store files in the system.

[Workflows and scheduling](#)

Apply workflows to pages, publish pages, approve pages or send them for approval to someone else.

Individual applications

Familiarize yourself with the functionality provided by individual applications.

[Blogs](#)

Publish and manage blogs and blog posts on your website. Manage blog comments and subscribe to other users' blogs.

[Events](#)

Create and manage events for which other users can register. Set a registration opening date and the maximum capacity of each event.

[Forms](#)

Create personalized online forms for site visitors to fill in so you can gather feedback, contact requests or further process the information in Kentico.

[Polls](#)

Display single, multiple, or open-ended answer polls on your site. Provide polls in various languages and display statistics of submitted responses.

Configuration

[Configuring the environment for content editors](#)

Set up the applications and other functionality that content editors use.
