

The **Bundle** product representation is designed to allow your customers to purchase several different products as a single [product](#). This approach can be highly effective if you are offering related products, or products that don't sell well enough separately.

Defining a bundle

If you are [adding](#) a new product or editing an existing one (on the **General** tab), you need to select *Bundle* as the value of the product's **Representing** property. After doing so, the system displays the **Bundle** section, allowing you to enter properties specific for the Bundle representation.

Bundle	
Remove from inventory	<p>Here you can define the behavior of the inventory.</p> <ul style="list-style-type: none"> • Remove bundle only - the system removes the bundle from the inventory as a whole. • Remove each product separately - the system removes individual product items within the bundle from the respective inventories. • Remove both bundle and products - the system removes both the bundle and individual product items within the bundle from the respective inventories.
Products	<p>Here you can add products to be shipped within the bundle:</p> <ol style="list-style-type: none"> 1. Click Add products. 2. Select products in the displayed selection dialog as required. 3. Click Select. <p>To remove selected products from the bundle, click Remove selected. To remove all products from the bundle at once, click ... -> Remove all.</p> <div style="background-color: #fff9c4; padding: 10px; border: 1px solid #ccc;"> <p> You cannot add the <i>Bundle</i> product representations into a bundle.</p> </div>

The screenshot shows the 'General' tab of the product editor. The 'Representing' dropdown is set to 'Bundle'. Below this, the 'Bundle' section is expanded, showing three radio button options for 'Remove from inventory': 'Remove bundle only', 'Remove each product separately' (which is selected), and 'Remove both bundle and products'. Under the 'Products' section, there is a list of products with checkboxes: 'AeroPress', 'Ethiopia Yirgacheffe (8 oz)', and 'Kenya Gabuyuni AA (8 oz)'. At the bottom of the section are buttons for 'Remove selected' and 'Add products'.

Bundle price calculation

During its price calculation, a bundle behaves as a separate product. Neither taxes nor discounts related to individual products contained in the bundle are reflected in the calculation.
