

The following example demonstrates how the system logs [activities](#) for anonymous visitors and registered users. You can try out the example on the sample **Dancing Goat** site.

1. Visit the live website as an anonymous visitor (without signing in) and perform some actions, for example, view the Home page and search for *Colombian coffee*.
2. Sign in to Kentico as an administrator.
3. Open the **Contact management** application on the **Contacts** tab.
 - The system has created an anonymous visitor.

	Actions	First name	Last name	Email address	Status	Country	Created
		Anonymous		2017-07-17 13:57:36.227			7/17/2017 1:57:36 PM

4. **Manage**  the new anonymous visitor and switch to the **Activities** tab.
 - You can see that the system logged the *Landing page*, *Internal search*, and *Page visit* activities.

	Actions	Title	Type	Activity time	Site name
		Page visit 'Search result'	Page visit	7/17/2017 2:00:05 PM	Dancing Goat
