

The system allows you to check pages for broken links. Only links within `<a>`, `<img>`, `<script>` and `<link>` elements are validated by the link checker.

1. Open the **Pages** application.
2. Select a page in the content tree.
3. Switch to **Preview** mode.
4. Open the **Validate -> Link checker** tab.
5. Click **Validate**.

| Status code    | Type | Error message   | URL  | Request time |
|----------------|------|---|--|--------------|
| Redirect -> OK | W    | /KenticoCMS_8.0.0219/Admin/username=administrator<br><b>redirects to</b><br>http://localhost/KenticoCMS_8.0.0219/CMSPages/logo.aspx?ReturnUrl=%2fKenticoCMS_8.0.0219%2fAdmin%2fCMSAdministration.aspx%3fusername%3dadministrator&username=administrator <b>OK</b> | http://localhost/KenticoCMS_8.0.0219/CMSPages/logo.aspx?ReturnUrl=%2fKenticoCMS_8.0.0219%2fAdmin%2fCMSAdministration.aspx%3fusername%3dadministrator | 118 ms       |
| Redirect -> OK | W    | /KenticoCMS_8.0.0219/SpecialPages/User/My-account.aspx<br><b>redirects to</b><br>http://localhost/KenticoCMS_8.0.0219/SpecialPages/Login-page.aspx?ReturnUrl=%2fKenticoCMS_8.0.0219%2fSpecialPages%2fUser%2fMy-account.aspx <b>OK</b>                             | http://localhost/KenticoCMS_8.0.0219/SpecialPages/Login-page.aspx?ReturnUrl=%2fKenticoCMS_8.0.0219%2fSpecialPages%2fUser%2fMy-account.aspx           | 6714 ms      |
| Redirect -> OK | W    | /KenticoCMS_8.0.0219/SpecialPages/E-shop/Wishlist.aspx<br><b>redirects to</b><br>http://localhost/KenticoCMS_8.0.0219/SpecialPages/Login-page.aspx?ReturnUrl=%2fKenticoCMS_8.0.0219%2fSpecialPages%2fE-shop%2fWishlist.aspx <b>OK</b>                             | http://localhost/KenticoCMS_8.0.0219/SpecialPages/Login-page.aspx?ReturnUrl=%2fKenticoCMS_8.0.0219%2fSpecialPages%2fE-shop%2fWishlist.aspx           | 29 ms        |

If the validator finds broken links on the page, you can view the following information for each detected issue:

- **Status code** - the HTML status code returned when the link is accessed. Statuses of redirected links are shown for each page within the redirection.
- **Type** - W for links redirected to a different location (301 status code), E for broken links (404 status code).
- **Error message** - details about the link issue.
- **URL** - URL to which the link is pointing.
- **Request time** - time elapsed between sending a request to the link and receiving a response.
