

To install Kentico, run the *Kentico_11_0.exe* file, which opens the **Kentico Installer**:

Installing Kentico

Evaluation

You can begin by [installing Kentico for evaluation purposes](#).

Local installation

Check if your development server meets the [recommended configuration](#).

Install Kentico on your local computer by following our [custom installation guide](#). If you come across any difficulties with selecting the right options, see [Installing Kentico \(Q&A\)](#) for recommendations.

Remote installation

Check if your development server meets the [recommended configuration](#).

Develop your website on a remote server or set up a production environment. You will find detailed procedures for this type of installation in the [Deploying Kentico to a live server](#) section.

Where to get more information?

To learn how to develop websites, see the [Kentico 11 Tutorial](#).

You can also visit our portal for developers with blogs, forums, knowledge base and other documentation material at [DevNet](#).

If you need advice on how to use Kentico, feel free to [contact our support](#). The support team operates non-stop and will be happy to help you.
