

On this tab, you can enable [WebDAV integration](#) and configure which file types should be editable using WebDAV.

 WebDAV is only functional if Kentico is configured to use [Windows authentication](#), otherwise this settings have no effect.

General	
Enable WebDAV support	Enables or disables WebDAV editing in both the Edit mode and the Browse mode .
Supported file extensions	<p>List of file extensions that should be editable using WebDAV Edit mode. The Edit in client application () icon is only displayed next to pages with this extension.</p> <p>Enter extensions with or without the leading dots, separated by semicolons; e.g. <i>.docx;.xlsx;.pptx;jpg;jpeg</i>.</p> <p>An appropriate client application with WebDAV support must be installed on the client machine for each listed extension in order for WebDAV editing of these files to be possible.</p>
