You can edit files inserted into media libraries. If you edit an image, the system opens its <u>built-in image editor</u> that allows you to perform operations such as cropping, resizing, rotating and so on. For other file types, you can <u>edit metadata</u> only, i.e. information about the attached file, such as **Title** and **Description**.

## To edit files in media libraries

- 1. Open the **Media libraries** application.
- 2. Edit ( ) the Media library that contains the files that you want to edit.
- 3. Click on the file that you want to edit.
- 4. Edit (🖍) a file. If you edited an image file, an Edit image dialog opens. Otherwise, an Edit metadata dialog opens.
- 5. Edit the file.
- 6. **Save & Close** the changes that you make.

The system saves the modified file.
