Some applications within Kentico can be configured to send automated emails. You can modify the email addresses from which these applications send emails in the **Settings** application. The table below lists all configurable sender email addresses and their location and name within the **Settings** application:

Location	Setting name	Description
System	No-reply email address	The system's default sender email address. Used for all types of automated system emails if no other email address is specified.
System	Send email notifications from	Sender address used for the following system email notifications: • Content notifications (when using the default email notification gateway) • Notifications about errors in the event log • Notifications about contact scores • Notifications about report subscriptions • Notifications for administrators about new community groups that require approval
Content -> Blogs	Send blog emails from	Sender address of notification emails for blog comments, subscriptions, and content modifications.
Content -> Translation services	Default email sender	Sender address used by the default email translation service when no user email address is available, for example in the case of translations submitted automatically or via the API.
Content -> Content management	Send workflow emails from	Emailaddress of the workflow e-mails sender. You can also use the *Someone<some@something.com>* format.
Security & Membership -> Passwords	Send password emails from	Sender address of password recovery emails.
E-commerce	Send e-commerce emails from	Sender address of e-commerce notification emails.
Community -> Forums	Send forum emails from	Sender address of forum notification and subscription confirmation emails.
Community -> Messaging	Messaging sender email	Sender address of message notification emails.
Community -> Message boards	Send message board emails from	Sender address of notifications about new message board messages.
Intranet & Collaboration -> Events	Sender's email	Sender address of automatic event registration confirmation messages.
