On this tab, you can enable WebDAV integration and configure which file types should be editable using WebDAV.

> ❌ WebDAV is only functional if Kentico is configured to use Windows authentication, otherwise this settings have no effect.

General	
Enable WebDAV support	Enables or disables WebDAV editing in both the Edit mode and the Browse mode.
Supported file extensions	List of file extensions that should be editable using WebDAV Edit mode. The **Edit in client application** (⇥) icon is only displayed next to pages with this extension. Enter extensions with or without the leading dots, separated by semicolons; e.g. *.docx;.xlsx;.pptx;jpg;jpeg*. An appropriate client application with WebDAV support must be installed on the client machine for each listed extension in order for WebDAV editing of these files to be possible.
