In this section of the Kentico E-commerce Solution documentation, you can find examples and guidelines about customizing customers.

Customizing creation of new customers

1

Modify the way Kentico creates new customers. For example, add new customers automatically extra customer credit.

Synchronizing customer and user properties

Find out how properties of registered customers are synchronized with properties of their user accounts. Change the process if necessary.

Customizing customers' preferred currency, payment method and shipping option

Modify the way Kentico chooses the default currency, payment method and shipping option for your registered customers.
