You can use the **Media gallery** web part to display content of a media library on the live site.

Putting the Media gallery web part on your web page

1. Open the **Pages** application.
2. Choose the page on which you want to place the web part.
3. Switch to the **Design** mode.
4. Place the **Media gallery** web part to a **content area** of your choice. The **Web part properties** dialog box opens.
5. Under **Content**, specify the **Media library** to which you want to be able to upload files.
6. Under **Upload settings** turn the check-box on for the following properties:
    a. **Allow upload** - enables on-site upload of files.
    b. **Allow upload thumbnail** - enables on-site upload of file thumbnails.
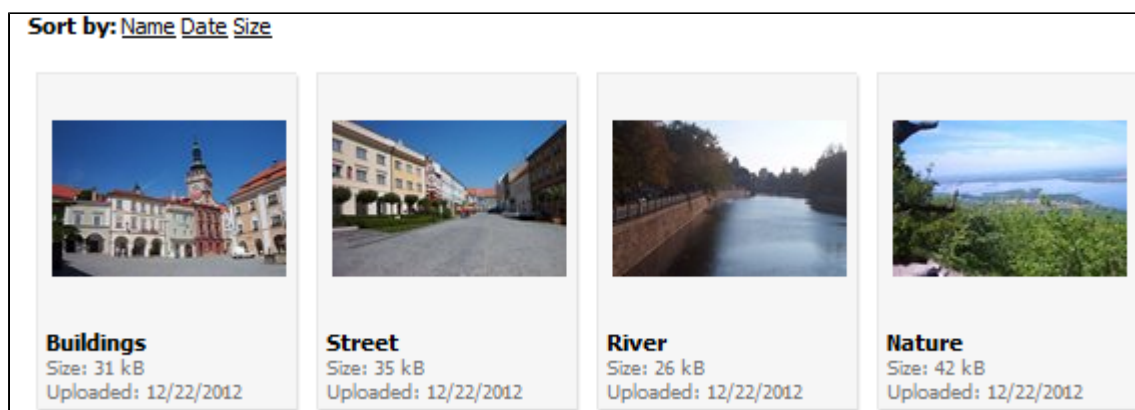

> ℹ️ Note that you **Allow upload thumbnail** works only when **Allow upload** is enabled as well. The Thumbnail that you upload is always attached to the file that you upload with it.

7. (Optional) If you are displaying items from a secured media library, **Enable** the **Check file permissions** property.
8. Click **Save & Close**.

Viewing the media library content using the Media gallery web part

Now that you inserted the **Media library** web part onto your page, visitors can use it to view the content of the media library.

1. Open the **Live site**.
2. Select the folder that you want to view in the web part.

> ℹ️ Note that whenever you resize an image that you inserted using a web part, the link to that image changes. Refer to URLs of resized images for more information.
