This topic describes how you can delete single or multiple content tree files.

To delete a content tree file

1. Open the **Pages** application.
2. In the content tree, click on the file that you want to delete.
3. Click on **Delete** (🗑).

The system deletes the content tree file. If you ever need to restore the file, refer to the page about restoring deleted pages.
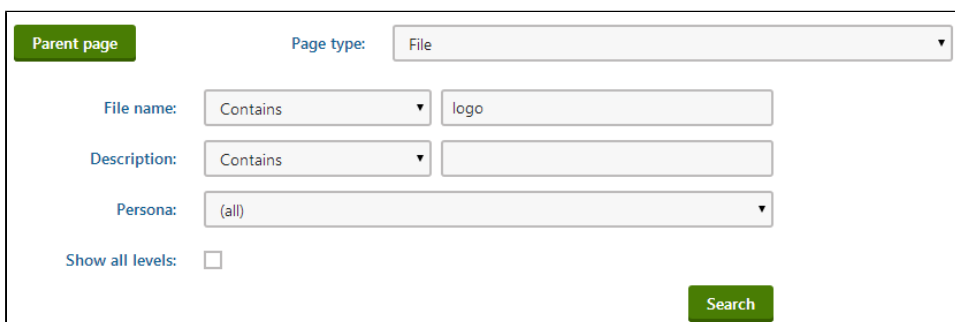

To delete multiple content tree files

Before you delete multiple files from the content tree, you need to list them

Listing content tree files

1. Open the **Pages** application.
2. Click on the page that contains the files that you want to delete.

3. Switch to **Listing**.
4. In the **Page type** drop-down list, select **File**.
5. (Optional) Use the filter's **File name** and **Description** fields to narrow the files that you want to delete.

6. Click on **Submit**. The system lists files based on the criteria you specified in the filter above.

Deleting multiple content tree files

1. Select the files that you want to delete. To select a file, turn the check box next to the file on. If you want to delete all the listed pages, leave the check boxes off.

2. In the first drop-down list under the listed pages, choose whether you want to perform the action on **Selected pages** or **All pages** (files in the content tree are considered pages too).
3. In the second drop-down list, choose **Delete**.
4. Click **OK**. The **Delete multiple pages** dialog opens.
5. Specify the deletion options.
6. Click **Yes** to confirm.

The system deletes the files that you specified. If you ever need to restore these files, refer to a topic about restoring deleted pages.
