You can remove product options or whole product option categories from your on-line store in the **Product options** application.

> ℹ️ You cannot remove product options from Text product option categories. This is because each category of this type contains just one option – the text itself.
>
> If you need to remove Text product options, remove their categories.

1. Select the product option category that contains the options you want to remove, and click **Edit** (✎).
   - (Optional) **Delete** (🗑) the category. The system removes all options contained in the category at once.

   > ⚠️ You cannot remove product option categories:
   >
   >   ○ if the system uses the contained options in at least one order, or
   >   ○ if the system uses the contained options in at least one product variant.

2. Switch to the **Options** tab.
3. Select a product option and click **Delete** (🗑).

   > ⚠️ You cannot remove product options:
   >
   >   • if the system uses the options in at least one order, or
   >   • if the system uses the options in at least one product variant.

   - (Optional) Repeat this step if you want to remove more options from the category.

The system removes the product options from your on-line store.

> ℹ️ You can also remove product options from your on-line store in the **Products** application while editing products on the **Options -> Option categories** tab.
